

Supplemental Fig. 4. Expression of notch and wnt pathway genes within the PSM and newly formed somites of anole embryos by whole mount *in situ* hybridization. Anole *axin2* (A, n = 3) and *dusp6* (B, n = 3) were not observed to display dynamic expression. C, Expression of the mouse *Hes1* orthologue *hes4* (n = 2) was restricted to the neural tube. D, *jag1* was expressed in the caudal PSM and a band in the rostral PSM.
