# Sustainability Consultation Report: Shepley Bulfinch

Tari Wager

#### **Introduction**

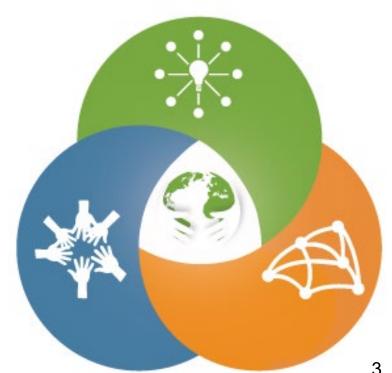

# SHEPLEY BULFINCH

#### Proposed Solution

- Business Sustainability Assessment
- Sustainability Engagement Session
- Sustainability Consultation Report

#### Methods: Business Sustainability Assessment

#### 1. Five - level Organizational Map

|                        | Description of Level   | Description of Organization |  |
|------------------------|--|-----------------------------|--|
| System                 | This level describes the overall major functions of the system Shepley<br>Bulfinch is in and depend on, i.e., markets, value-chains and other<br>stakeholder networks within society within the biosphere.   |                             |  |
| Principles for Success | This level specifies a vision or visions of success for the organization or<br>other subject of the planning within robust boundary conditions for a<br>global sustainable society   |                             |  |
| Strategic Principles   | This level specifies prent's guidelines for how to appreach the outlined<br>sustainability-framed vision strategically. It implies a step-by-step<br>appreach that ensures that resources, including financial resources,<br>continue to feed the process towards the defined vision. Additional<br>guidelines can be added by an included organization depending on the<br>context. It is important to note that many visible pathways to a vision<br>visually exist. |                             |  |
| Actions                | This level describes concrete actions that have been prioritized into a<br>strategic plan using the above strategic guidelines to arrive at the vision<br>of success in the system.  |                             |  |
| Tools                  | Tools, methods, concepts and other types of support are offer required to aid decision making, monitoring and decisioners of the actions to ensure they are chosen strategically to arrive at the defined success in the system. Examples are modeling tools, management systems, indications. We cycle assessment tools   |                             |  |

#### 2. <u>Current Implementation Assessment</u>

|   |  | Eco-Efficiency   | Eco-Innovation/Eco-Ethical  | SustainableVisionary   |
|---|--|--|---|--|
| At the very base level,<br>concern with compliance,<br>jaiss called reactive and<br>middle readers) that is<br>businesses complying with<br>environmental and business<br>regulations to minimize Snes. | Companies reduce or<br>eliminate effluents and<br>emissions by innovative<br>changes in operations or<br>resource substitution. This<br>saves crosts, as end-of<br>-pipe solutions at the<br>complance level can be<br>coefly. | At the third level, companies, can save siven most by can darke siven most by can darke siven as the sevel is referred to as exceeding sevel, solving money by minimizing waste, resources and energy use, is the main business focus. | Sustainability endewors are<br>boused on mirramoning<br>environmental impact) improving operations, resource<br>and energy use, and the final<br>product. These businesses have<br>moved beyond cost savings and<br>now attain a competitive<br>one attain to competitive<br>management of the competitive<br>environment of the competitive<br>environment of the competitive<br>saving and the competitive<br>competitive<br>saving and competitive<br>(also referred to as proactive). | These businesses have goals<br>beyond minimizing or removing<br>enhancemental impacts, they<br>from also on societal impacts,<br>using these impacts as drivent<br>for their organizational advises.<br>Sustainability principles are<br>omediced arouses the<br>organization and there is<br>pervading organizational culture<br>for sustainability.  |
|   |  |  |   |  |
|   |  |  |   |  |
|   |  |  |   |  |
|   |  |  |   |  |
|   |  |  |   |  |
|   | concern with compliance,<br>jalso called reactive and<br>middle roaders) that is<br>businesses complying with<br>environmental and business  | At the very base level, concern with compliance, laiso called reactive and middle readers) that is in some substitution. This businesses complying with environmental and business expended on terminating from minimize final.        | At the very base level, concern with compliance, isless called reactive and middle reaces) that is called reactive and middle reaces just is expensed to complying with source substitution. This businesses complying with environmental and Dusiness - pipe southors at the angulators to minimize fines.   | At the very base level, concentrate efficients and concentrate even more by improving eventrate use. This level, except the instrument of eventrate even more by improving eventrate use. This level, except the eventrate use and energy use, and the final product. These businesses even of eventrate eventrate use. This level, except the eventrate use the improving eventrate use and energy use, and energy use |

#### 3. Application of FSSD

|                        | FSSD  | Rinks  | Opportunities |  |
|------------------------|---|--------|---------------|--|
| System                 | Global system as a guide for more micro<br>decisions, High-level model of planet-<br>biosphere-human system   | 11.000 |               |  |
| Principles for Success | 4 System Conditions (8 Strategic Sustainability<br>Principles)  |        |               |  |
| Strategic Principles   | Head towards SPs, Backcasting from<br>success, Flexible Platforms, ROI as speed<br>dial (Transparency, Accountability), Integrate<br>other approaches |        |               |  |
| Actions                | Application of FSSD, Act on findings  |        |               |  |
| Tools                  | FSSD SPs. Growing tool base. Other Tools  |        |               |  |

### Methods: Sustainability Engagement Session

Outcomes: Business Sustainability Assessment

LAKE FLATO, Gensler WRNSSTUDIO,

SHEPLEY BULFINCH

#### Outcomes: Sustainability Engagement Session

- Vision
- Assess Current Situation
  - Challenges
  - Assets
- Possible Solutions
- Strategic Plan

#### Lessons Learned

- Perseverance
- Flexibility
- Communication
- Business Operations
- Sustainability & Design

#### Recommendations

- Company Culture
- Education
- Marketing/Branding
- Business Operations

#### Next Steps

- Deeper Dive into Business Operations/Design Process
- Sustainability Action Plan

# Thank you!
