Changes in Diet and Lifestyle and Long-Term Weight Gain in Women and Men

Dariusz Mozaffarian, M.D., Dr.P.H., Tao Hao, M.P.H., Eric B. Rimm, Sc.D.,
Walter C. Willett, M.D., Dr.P.H., and Frank B. Hu, M.D., Ph.D.

ABSTRACT

BACKGROUND

Specific dietary and other lifestyle behaviors may affect the success of the straightforward-sounding strategy “eat less and exercise more” for preventing long-term weight gain.

METHODS

We performed prospective investigations involving three separate cohorts that included 120,877 U.S. women and men who were free of chronic diseases and not obese at baseline, with follow-up periods from 1986 to 2006, 1991 to 2003, and 1986 to 2006. The relationships between changes in lifestyle factors and weight change were evaluated at 4-year intervals, with multivariable adjustments made for age, baseline body-mass index for each period, and all lifestyle factors simultaneously. Cohort-specific and sex-specific results were similar and were pooled with the use of an inverse-variance-weighted meta-analysis.

From the Division of Cardiovascular Medicine (D.M.) and Channing Laboratory (D.M., E.B.R., W.C.W., F.B.H.), Brigham and Women's Hospital and Harvard Medical School; and the Departments of Epidemiology (D.M., T.H., E.B.R., W.C.W., F.B.H.) and Nutrition (D.M., E.B.R., W.C.W., F.B.H.), Harvard School of Public Health — all in Boston. Address reprint requests to Dr. Mozaffarian at 665 Huntington Ave., Bldg. 2-319, Boston, MA 02115, or at dmozaffa@hsph.harvard.edu.

What else did we learn?
Being a partner,
Not an expert

From “we are experts”

To partnership in research

- Disciplinary practices, research topics, reading habits
- Data management practices
- Research requirements throughout the curriculum

..and partnership in publishing

- Collaborative writing practices
- Manuscript review: abstract, title, keywords
- Journal selection, open access, and copyright needs

The door is open everywhere
