

OPENING MINDS TO OPEN ACCESS: BEST PRACTICES AT ARIZONA STATE UNIVERSITY LIBRARIES

Virginia Pannabecker

Health Sciences Librarian

& Alexandra Humphreys

Instruction and Education Librarian

Opening Minds to Open Access

“Those with access to these resources — students, librarians, scientists — you have been given a privilege. You get to feed at this banquet of knowledge while the rest of the world is locked out. But you need not — indeed, morally, you cannot — keep this privilege for yourselves.”

~Aaron Swartz, Guerilla Open Access Manifesto (http://archive.org/stream/GuerillaOpenAccessManifesto/Goamjuly2008_djvu.txt)

Opening Minds to Open Access

“ We’re interested in Open Access because a student’s education is only as valuable as the information that a student has access to... Open Access increases the value of our education after we leave school.”

~Matt Cooper

Immediate Past President of the National Association of Graduate-Professional Students

~ at the SPARC/World Bank 2012 Open Access Week Kickoff event

Opening Minds to Open Access

What is Open Access (OA) to research literature?

- Free of charge for users
- Online
- Free of most copyright and licensing restrictions

Opening Minds to Open Access

Today you will learn about:

- Events
 - Open Access Week
 - Open Education Week
 - Every Day OA (presentations, webcasts, etc.)
- Methods for Promoting OA Participation
 - Scholarly Communication library guide
 - Memberships
 - Conference presentations
 - ASU Digital Repository
- Finding OA Resources
 - Open Access Library Guide
 - Institutional Repositories (access via Google Scholar)
 - DOAJ

Open Access Week @ ASU

Open Access: What You Should Know

Friday, Oct. 26 at 12:00 Noon
Hayden Library Upper Concourse: Room C6A

Anali Perry
&
Alexandra Humphreys

Open Access especially impacts students in their education and in their future careers. For this presentation, ASU's Graduate and Professional Student Association partners with the ASU Libraries to educate students about the importance of open access. Bring your lunch and join librarians Anali Perry and Alexandra Humphreys as they explain what open access means, discuss its effect on students, and offer suggestions on how to get involved. There will be time for discussion and questions.

Opening Minds to Open Access: Open Access Week @ ASU

Welcome to Open Access Week

It's that time of the year, **Open Access Week**, where we celebrate open access to scholarly information. As this *Library Minute* explains, open access is free, immediate access to scholarly information online, along with the right to use and reuse that information however you need. This year, the ASU Libraries are partnering with the Graduate Writing Centers to offer a special workshop on a topic near and dear to every graduate student's heart - their thesis or dissertation!

The Impact of Open Access and Your Dissertation: Clearing the Confusion

How has open access affected graduate student theses and dissertations? What impact does it have for you if your theses is available online for free? How are theses and dissertations archived at ASU? Come find out during this brownbag presentation in celebration of the 6th International Open Access Week, sponsored by the Graduate Writing Centers and ASU Libraries! There will be refreshments!

Times and locations:

Monday, October 21, 3:30-4:30

Downtown Phoenix Graduate Writing Center: Post Office at Fillmore & Central, Room L1-32, lower level

Tuesday, October 22, 12 noon-1:00

Tempe Graduate Writing Center: Hassayampa Building F, first floor room 122

Thursday, October 24, 12 noon-1:00

Tempe Graduate Writing Center: Hassayampa Building F, first floor room 122

Additionally, the [Graduate and Professional Student Association](#) is hosting a viewing party of the World Bank's "Redefining Impact" event. The event will begin with a panel discussion entitled, "*Open Access: Redefining Impact*". Among the topics to be discussed are Article Level Metrics (ALM's) and changing the way scholarly communication is measured.

The following panelists will each discuss what it means to them, their institutions, and their work:

- Dr. Stefano Bertuzzi, Executive Director of the American Society for Cell Biology (ASCB)
- Brett Bobley, Chief Information Officer for the National Endowment for the Humanities
- Dr. Kathleen Fitzpatrick, Director of Scholarly Communication of the Modern Language Association
- Dr. Cameron Neylon, Advocacy Director for Public Library of Science
- Dr. Michael Stebbins, Assistant Director for Biotechnology in the Science Division of the White House Office of Science & Technology Policy

The GPSA "Redefining Impact" viewing party will take place on **Wednesday Oct 23** at 5:30pm at the [Graduate Student Center](#). Refreshments will be

Opening Minds to Open Access: Every Day OA

Increasing Public Access to Federally Funded Research

Tell the White House to **expand** open access to research funded by all U.S. federal science agencies

Act Now!
Sign the petition:
<http://wh.gov/6TH>

U.S. Government agencies, such as the National Institutes of Health (NIH), are some of the most important sources of funding for scholarly research. As with all aspects of government, the grants these agencies provide come from taxes collected from U.S. citizens. However, the

results of this research are usually communicated through articles published in journals that require a subscription or fee to access. This means that this knowledge is restricted to those who can pay to read it, either through their place of employment or education or their private funds. Taxpayers are being asked to pay twice for the same research- first to conduct it and then again to learn the results.

In 2006, the NIH implemented a **public access policy** which required all recipients of NIH funding to deposit the final copy of their research articles in a free, publicly-accessible database called **PubMed Central**. Since the implementation of this requirement, PubMed Central has become a valuable source of reliable scientific research with over 2.4 million articles and receives over 500,000 visits per day.

Today, a **petition** calling for public access to all federally funded research has been posted on whitehouse.gov. This petition seeks to build on the success of the NIH public access policy by expanding it to all federally funded science agencies. The belief driving this petition is that all taxpayers should be able to access the results of the research they fund. This would greatly benefit everyone: students, teachers, researchers, patients, and entrepreneurs. Open access to federally funded research increases the global reach and impact of that research through ease of discovery. It allows scholars to have access to the most current research activities in their field and encourages innovative, interdisciplinary approaches.

If you believe that the White House should expand the NIH public access policy to all U.S. Federal Science Agencies and promote public access to taxpayer-funded research, go to whitehouse.gov before June 19 and **sign the petition**. If the petition garners 25,000 signatures, it will be submitted to the White House for an official administrative response.

Scholars Without Borders: How to Get Free, Open Access Articles (Workshop)

Workshop: *Scholars Without Borders: How to Get Free, Open Access Articles*

Date: Thursday March 15, 2012

Time: 5:00-6:30pm

Location: Hayden Library, Room C6A/East (on Upper Concourse Level), Tempe campus

Description: Academic libraries and other institutions spend considerable portions of their budgets on databases that help with their assignments. Since 2001, when the open access movement began, many new scholarly journals have been launched and an increasing number of established print journals have switched to an open access format. Although the proportion of open access articles remains small, the number of scholarly journals and articles available free of charge to users continues to grow steadily.

Attendees of this presentation will be introduced to the concept of open access, learn how to find free scholarly articles, and discuss various aspects of this relatively new practice in the world of scholarly publishing.

Presenters:

- **Alexandra Houzouri Humphreys**, Education & Instruction Librarian
- **Rachel Leket-Mor**, Philosophy & Religious Studies Librarian
- **Ram Pendyala**, Professor, School of Sustainable Engineering & the Built Environment
- **Jere T. Humphreys** (Moderator), Professor of Music

Opening Minds to Open Access: Promote Open Access

On October 20, 2010, The Librarians Assembly passed an Open Access Resolution declaring our commitment to Open Access.

We, the Librarians Assembly of Arizona State University (ASU) Libraries, resolve the following:

1. To disseminate our scholarship as broadly as possible. We endeavor to make our scholarly work openly accessible in conformance with open access principles. Whenever possible, we make our scholarship available in digital format, online, and free of charge.
2. To grant ASU Libraries a Creative Commons "Attribution Noncommercial-No Derivative Works 3.0 United States" license to each of our scholarly works to allow the ASU Libraries the right to archive and make publicly available the full text of our scholarly works via the ASU Libraries' digital repository.
3. To deposit the author's final version of our scholarly work in the digital repository as soon as is possible, recognizing that some publishers may impose an embargo period.
4. To seek publishers whose policies allow us to make our scholarly works freely available online. When a publisher's policies do not allow us to make our works freely available online, we resolve to engage in good faith negotiations with the publisher to allow deposit of pre- or postprint versions of our scholarly work in the digital repository.
5. To promote Open Access on campus and assist scholars in making their research openly available.

The resolution applies to the scholarly works authored and co-authored while employed at ASU Libraries, beginning with works submitted for publication after October 20, 2010. The works encompassed by this resolution include journal articles and conference proceedings. We encourage the deposit of other scholarly work as defined by Librarians Assembly.

This open access resolution will be reviewed by Librarians Assembly after one year.

Search this collection

This growing collection consists of recently published articles authored by members of the ASU community.

The collection goal is to preserve and provide open access to these articles in order to help facilitate new research and collaboration.

While this collection aims to be as comprehensive as possible, some articles may not be included due to publisher restrictions or lack of permission from the author.

This collection starts with articles added to the Web of Science as of July 2013, moving forward. However, ASU-affiliated authors who wish to add previously published articles are welcome to contact us at digitalrepository@asu.edu.

Opening Minds to Open Access: Best Practices at Arizona State University

Feedback Bookmark Metadata Citeable URL Public View Edit Delete

Abstract Increasingly, information seekers can utilize "open access" (OA) resources, primarily scholarly research journals, at no cost to themselves. However, many who could benefit from free access to research do not know about it. This presentation will present resources and outreach activities related to Open Access from the Arizona State University library system. The purpose is to encourage greater understanding of and participation in OA practices. Examples include: (a) library guides on scholarly communication and open access resources; (b) resources for Open Access Week, Open Education Week, and other events; (c) participation in open access through outreach to our user communities; (d) institutional memberships in OA organizations and othe...
