Dr. Viktor Hamburger  
Department of Zoology  
Washington University  
St. Louis, Missouri

Dear Dr. Hamburger:

I certainly hope that the University Press will accept your Laboratory Manual. It is ~~my~~<sup>now</sup> years since I have had any connection with their publication committee, but the Department of Zoology is represented by Dr. Thomas Park and I am giving him my good opinion of your work for whatever it may be worth.

I am sure this must be a busy year for you, carrying on the department with a reduced staff, but at any rate it is very satisfactory to have plenty of occupation in these troubled times. Of course your views on the relations of genetics and experimental embryology will interest me very much, and I shall be delighted to receive your paper on the subject.

Let us look forward to meeting again in Woods Hole this summer. With my best regards,

Yours truly,

Frank R. Lillie
