Dear Viktor:

Re: Ms. JN-25-80

Copies of the reviews of your paper "Neuronal death in the spinal ganglia of the chick embryo and its reduction by nerve growth factor" have now been returned to the Section Editor and to my office, and I am glad to inform you that the paper is considered suitable for publication in the Journal in its present form.

I have accordingly forwarded the manuscript and figures to Williams & Wilkins for publication. You should hear from the publishers within three or four weeks of the safe arrival of the manuscript, and the number they have assigned to it. Further correspondence about the manuscript should be with:

Mr. Donald Brown  
Williams & Wilkins Co.  
428 E. Preston St.  
Baltimore, Maryland 21205  
(301) 528-4117

For your interest, I am enclosing copies of the reviewers' comments together with the priority assigned to the paper by the reviewers.

The new copyright law which went into effect on January 1, 1978 requires that the publisher be assigned the copyright of the articles published in its journals. To conform with this requirement I should be grateful if you would complete the enclosed form provided by Williams & Wilkins, and return it directly to the publisher.

Thank you for submitting this interesting paper to the Journal of Neuroscience.

Sincerely yours,

W. Maxwell Cowan, M.D., Ph.D.  
Editor-in-Chief
