Dr. Victor Hamburger
Hull Zoological Laboratory
University of Chicago
Chicago, Illinois

Dear Dr. Hamburger:

I have your letter of November first. You will probably have about thirty minutes at your disposal for your lecture.

I am not certain as to whether the symposium will be published together but I should think that the matter would be entirely optional. You might consult Paul Weiss on this matter because last year he helped to give a symposium at Atlantic City. It is my impression that Harrison published his speech but Weiss did not. I do not expect to publish mine because the manuscript will appear in the *Journal of Experimental Zoology*. I think it might be wise for you to publish the preliminary note.

Under separate cover I am sending you one of my reprints and I trust that it will be of some use to you. I went to New Haven to hear two of Spemann's lectures and enjoyed them very much. He seemed to enjoy his sojourn at Yale although he was probably not too enthusiastic about all of the social functions. With best wishes.

Sincerely yours

S. R. Detwiler
