Dr. R. B. Masterton,  
Florida State University  
Psychology Department  
Tallahassee, Florida 32306

Dear Dr. Masterton:

Ms. Judy Brunso-Bechtold is interested in joining my laboratory as a Postdoctoral Fellow to broaden her experience in developmental neurobiology. I would appreciate it if you would give me your frank appraisal of her capabilities, and in particular of her motivation, her manual technical skills (which is important in microsurgery on embryos) and her familiarity with neuro-histological techniques. I met her briefly at the Neuroscience Meeting in New York and <sup>she</sup> made a good impression on me. Would she be a congenial collaborator in a small research group?

With many thanks in advance,

Sincerely yours,

Viktor Hamburger  
Professor emeritus
