

WELLESLEY COLLEGE
WELLESLEY, MASSACHUSETTS

DEPARTMENT OF
ZOOLOGY AND PHYSIOLOGY

24 January 1940

Dear Viktor:

I've just finished correcting the proof on the Cp-MS and have sent back one copy; the author's copy I am sending on to you, in case you repent of something at the last minute, or find something else that got by me and the printer. You have a copy of the MS, don't you? I had to send the original back to GENETICS. If you do want to change anything, send it straight in. I hope you don't.

What about reprints? I'm enclosing the order blank, so that you can see prices etc.-the paper will run under 12 pages, by my calculations. I am just now writing Walter to see if the station buys any- I haven't the faintest idea what their policy is. Suppose you let me know how many you want, and return the blank to me. I'm sure that our reprint lists overlap a good deal and I think it would be a good idea to go over them together, if you are coming this way next summer.

Oh, yes: of course we couldn't escape without an abstract. I'm enclosing a copy of the one I wrote. If you want to change it, wire Dunn (adv. for Western Union).

I think that's all the business.

This year is not being awfully successful for me; I have plenty of work to do and no inclination at all to do it. The Wellesley freshmen seem to make me neurasthenic; probably the effect is mutual. Probably I should find some nice hard-boiled medical school (or reform school) if I intend to teach. My chief intellectual accomplishment to date has been to re-learn ice-skating.

Have you been having fun? Tell me how the Creepers are doing, and give my best wishes to Martha and the children.

Yours,

DR
