Dr. V. C. Hamburger
Zoology Department
Washington University
St. Louis, Missouri

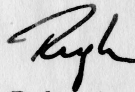

Dear Hamburger:

Under separate cover I am sending you our graduate laboratory outlines except for one or two that are now being printed. Practically all of these have been tried and there will be some revisions before the set appears in printed form in September. I would certainly appreciate any critical suggestions from you which might be taken into consideration well before that time.

I sincerely hope you are continuing with your work on later embryos for I am certain that I would want to use it to supplement this.

Will see you at Philadelphia - on the 30th at least.

Sincerely,

Roberts Rugh
