Dear Dr. Hamburger

I'm glad to hear that you plan to try to keep Dr. Rita Levi-Montalcini at Washington University. You make a good team. I'm hoping the enclosed letter will be helpful.

I have just received physicians' clearance to return to work after spending 6 mos in Saranac Lake, N. Y. for T.B. I'm starting on a part-time schedule here at Miami University for the winter quarter, preparatory to returning to full-time at Chicago in the spring. The doctors suggest it might be wise to look for a more healthful spot than Chicago in which to work. Should you know of any place needing someone to teach within reach of the nervous system, I'd be grateful if you'd let me know.

Hope the delay in my answer has not caused inconvenience. Extend my regards to Dr. Rita.

With best wishes.

R. W. Sperry
