St. Louis, Missouri 63130

Dear Viktor:

Now I understand why there was so much comment on the excellence of your presentation! - and why some said it was the highlight of the evening!

To the extent that I can manage an unbiased, uninvolved view it is a masterly job, far better than I had any reason to hope for. Perhaps it's just as well I was not in a position to hear clearly as I'd have been overwhelmed and soberly subdued to the point that it might have been difficult to make any lucid response. Once again, I am tremendously indebted to you.

It was great to see you still in fine fettle and I hope we'll have other occasions to look forward to.

Warm best wishes,

Roger
