Dr. Viktor Hamburger
Department of Biology
Washington University
St. Louis, Mo. 63110

Dear Dr. Hamburger:

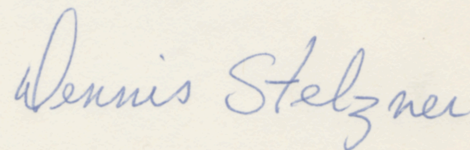

I really enjoyed the Neuroscience lectures you gave here at the University of Wisconsin and am excited about the tentative job proposal you offered me. I certainly want to investigate this possibility further and hope that a satisfactory arrangement can be made so that I can work with your group. I would like to be able to teach one or two courses a year related to my interests in behavior, neural structure, and development as well as doing research. Enclosed is my curriculum vitae.

My interests are broad and adaptable as long as they are related to neural or behavioral development. I foresee my using the various neuro-anatomical normal and degenerative techniques and the electron microscope as my major tools to pursue this line of research but hope that I have some time left over to do behavioral research as well.

As I mentioned to you, I have also had a tentative offer from Dr. Donald Goodman at the University of Syracuse and will be visiting with him on April 16 and 17. I will not make any definite commitments to Dr. Goodman but would like to tell him whether I will take his offer as soon as possible after that time.

I certainly am looking forward to hearing from you.
Give my regards to Mike Fox.

Sincerely,

Dennis Stelzner
